SKILLSET / TECHNOLOGY

Frontend : Javascript, Typescript, NextJS, React, Redux, Tailwindcss, HTML, CSS

Backend : NodeJS, ExpressJS, Redis, MongoDB, Sql Server, Prisma ORM, Mongoose

Others : TurboRepo, NextAuth, AWS, Github, Gitlab, RabbitMQ,

WORK EXPERIENCE

Publicis - Senior Software Engineer

Aug 2024 - Present

- Managed fintech project focusing on savings, credit card, and loan modules. Responsible for implementing updates, tracking and resolving daily bugs, and generating reports on system responses based on various scenarios and requirements.
- Handled the microservices architecture of the backend, focusing on developing scalable solutions. Worked with the ELK stack (ElasticSearch, Logstash, Kibana) to generate logs and create detailed reports based on log data.

Justdial - Senior Software Engineer

Nov 2022 - Aug 2024

- Led the creation and revamp of 4 essential Justdial applications across WebApp, Touch (Adaptive Web), **Android**, and **iOS** platforms. Utilized **Next.js** to efficiently handle server-side API calls, ensuring smooth **page loading** and transitions for an optimal **user experience**. Successfully implemented robust Auth mechanisms to safeguard user data and application access. Integrated **SEO** best practices to enhance the application's visibility in **search engine results**.
- Spearheaded the revamp of Justdial's core functionalities - **Free Listing** and **Advertise** - across Android, iOS, and WebApp platforms. Maintained a cohesive **user interface** throughout all platforms, likely leveraging a frontend framework. Integrated seamlessly with Backend APIs for efficient data management and functionality.
- Championed the initiative and led the development of a brand-new **Offers** page on Justdial. Built the app from scratch, enabling **vendors** to exclusively add and manage their **product offers**.

Dataminestech - Software Developer

Jan 2022 - Oct 2022

- Possess strong proficiency in building user-centric web applications with a focus on UI/UX best practices through **ReactJS** and **TailwindCSS**. Skilled in backend development using **NodeJs**, **Express**, and **MongoDB**, ensuring seamless data access and manipulation. Implemented a scalable web architecture for high-performance and real-time functionality, utilizing Node.js for event-driven development, Socket.io for real-time communication, and **Redis** for caching mechanisms. Adhere to the well-established MVC architecture for organized **code structure** and improved maintainability.
- Utilized your expertise in **UI/UX** design tools (Adobe XD or Figma) to craft visually appealing and user-friendly interfaces that adapt seamlessly across different screen sizes and devices. Focused on creating **efficient UIs** that prioritize a smooth user experience.

3M Technology - Mern Stack Developer

Mar 2021 - Jan 2022

- Acted as a self-driven developer, managing 3 projects independently from the design phase to development and final deployment. Possess a comprehensive full-stack development skillset, allowing you to design user interfaces, implement frontend functionalities, and develop robust backend logic (including both frontend and backend mentioned). Demonstrated a high level of self-reliance and accountability by taking complete ownership of these projects from start to finish
- Demonstrated a strong understanding of component-based development by creating reusable **ReactJS** components with **Bootstrap** integration for a consistent user interface.
- Skilled in working with relational databases like **SQL Server**, leveraging stored procedures, views, and functions to optimize data access and manipulation.

EDUCATION

Post Graduation (MCA CS) - Bangalore University, Jain University.

April 2024

Graduation (BSC IT) - Mumbai University, Viva Institute of Technology.

July 2019
